DISCLAIMER The information and advice in this handbook have been prepared in good faith and information is correct at the time of printing. It is emphasised however, that decisions related to career choice and the selection of the Challenge and subjects should be informed by consultation with parents/carers, the Co-ordinator of Power of 9, the Head of Teaching and Learning, Course Counsellors, mentors and subject teachers. Final responsibility rests with parents and carers as to the suitability of their child's choices.

HUTCHINS
ESTABLISHED 1846

Welcome to Year 9 at Hutchins

Welcome to Year 9 at Hutchins. What an exciting year you have ahead of you! The development of purpose is the most important part of a young person's life journey. We are passionate about your personal and social development, equipping you with skills for life and helping you explore your purpose in life.

As you move through this year our aim, through the Power of 9, is to encourage and assist you in developing the skills, the passion, the positive attitudes and values and forms of knowledge necessary for planning your pathway and being successful through Years 10, 11, 12 and beyond.

The School recognises differences in each of you and with it your needs and ways of learning. Hence we offer a variety of learning experiences and challenges. Year 9 is a great opportunity for you to explore a range of new and exciting possibilities. We encourage you to get involved and take advantage of many of these opportunities. What you do matters and our plans and expectations for you are clearly outlined on the following pages.

It is our view that you should be challenged and extended, offered success in worthwhile learning activities,

and be given the opportunity to take responsibility for your journey. There is also an expectation for you to be involved in and make a difference to your community.

This handbook is designed to help you make informed choices about your learning pathway through the first year of Senior School. In order to make the most of this opportunity you need to start planning. You can count on our support to help you develop and implement your plan. For it to be most effective there is work for you to do as well.

I wish you well as you explore the new possibilities and responsibilities that this exciting year brings. Pack your spirit of adventure and seize the opportunities that await!

Mrs Caitlyn Tulk
Co-ordinator of Power of 9

swagat Willkommen Benvenuto 歡迎
欢迎 Bienvenue ยินดีต้อนรับ

Please read this handbook carefully,
listen to advice and have conversations
with the people who can help – your
mentor, your teachers and, importantly,
your parents/carers.

Our Guiding Statements

Our Vision

Hutchins provides an inspirational education where each student strives to achieve their personal best and is willing to serve their community as an informed and active citizen.

Our Mission

Hutchins is an Anglican school whose supportive learning community works together to nurture character of boys.

Our Values

As a community, we aspire to be people of integrity who act with humility, kindness, courage and respect.

Our Faith

A Christian life, as a response to Jesus Christ, is commended and encouraged at Hutchins. We express our Christian values by welcoming and respecting members of all faiths, beliefs and traditions.

Our Motto

Vivit Post Funera Virtus – *Character Lives on After Death* – What you do matters.

Expectations

A Hutchins education is more than just academic studies. It is about continuing to learn and acquiring the knowledge and skills for learning, knowing how to create and nurture successful relationships, being a responsible citizen, being accountable for what you do and being the best person you can be.

To successfully approach Year 9:

- Participate fully in your Power of 9 course (Challenge and subjects)
- Participate fully in your compulsory co-curricular program
- Participate fully in your House program
- Participate in your academic review that addresses any gaps in your knowledge and skills
- Be organised and manage your time wisely
- Come to school on time every day
- Maintain an appropriate standard of dress and appearance
- Take responsibility for your learning
- Follow the guidelines for academic integrity and the use of the School's computer network
- Be responsible for your actions
- Show respect for yourself and others
- Take advantage of opportunities
- Complete an hour of study at home each night
- Create your personal portfolio (such as certificates, awards and best work)
- Work with the Careers Counsellor to commence your pathway plan
- Have a conversation with your mentor and Chaplain about how you may have a positive impact on the community through Service Learning
- Talk with your mentor, Head of House, Head of Senior School and senior students about how you may play a leadership role in the School

Community Service Learning

Community Service Learning allows students to develop new or otherwise hone their existing skills through a range of opportunities to serve the Hutchins and wider communities in a variety of contexts. Students who engage in service are encouraged to submit a Record of Service via Rory, which will be stored in an Individual Service Record that will be made available upon graduation (at your request). Both prior to and after graduation, the Service Record is a valuable document to demonstrate a commitment to service, leadership of self and others, and meaningful and positive contributions to the community. Senior School Service is separate from Middle School Service, and the beginning of Year 9 presents a new opportunity to build a portfolio of contributions to the House, school and community.

We encourage you to talk with the Co-ordinator of Senior School Service Learning, the Deputy Head of Senior School, and take part in serving others.

HOUSE AND SCHOOL SERVICE

Opportunities to support the House will regularly present themselves throughout each year, particularly on the Senior School campus. House staff will identify opportunities that include organising and running House-level activities and events (including BBQs, games, and larger scale events). Student service in the House will be considered for its contribution to the House and recognised within the House.

Outside of the House programs, many opportunities for community service will emerge throughout the school year, and will include activities similar to those in the House context but where a House group is not driving the activity, as well as other school-based service, including but not limited to preparing for and acting as the School Pianist in assemblies, acting as a tour guide during Open Days, or supporting younger students by attending subject help sessions and providing tutoring services. Additional opportunities to serve the School and wider community may present themselves, including in the Challenge term.

Leadership

COMMUNITY SERVICE

Opportunities to support the wider community emerge in the form of supporting charity events, programs and initiatives, and various other community-based initiatives. Students are welcome to identify service opportunities and submit them to the Deputy Head of Senior School for approval and inclusion in the Service Record. Community service opportunities will be presented, from time to time, throughout the Challenge term by Power of 9 staff.

All Year 9 students have the opportunity to work together and demonstrate leadership skills through their Challenge.

Other opportunities also exist for you to apply for established roles or to use your initiative in creating and developing new ones.

If you wish to be involved in a leadership position you could talk to either your Head of House or the Head of Senior School directly. There are many events throughout the school year that rely on leadership from students throughout the Senior School.

Power of 9 Personal Report

In keeping with the School's values, expectations and aims the Senior School strives to have you:

- Be a person of integrity who acts with humility, kindness, courage and respect
- Achieve your personal best
- Be willing to serve your community as an active and informed citizen
- Be caring of our local and global environments
- Build and maintain lifelong friendships
- Display qualities such as integrity, flexibility, reliability and empathy
- Develop skills in independence, self-motivation, leadership and co-operation
- Participate in a range of physical and appropriate risk-taking activities
- Be responsible for your own health and safety

The House system, at the heart of Senior School pastoral care, reinforces these principles and the relationships you develop with your mentor and Head of House can have a profound effect on your progress: academically, personally, culturally and spiritually.

As part of helping you develop in these areas you will receive a Personal Report completed by your mentor or Head of House at both the mid-year reporting period and at the end of the year. Both of these reports will:

- benchmark you against various criteria; and
- provide comments written by your mentor or Assistant Head of Senior School.

THE OUTCOMES

These outcomes represent the major attributes that you are expected to develop as you journey through the Senior School. You will be assessed against how you:

1. Demonstrate initiative, leadership and co-operation
2. Participate enthusiastically in your House program
3. Uphold Hutchins standards for personal presentation
4. Build positive social relationships with others
5. Are punctual to school and House activities
6. Seek and take the opportunities available to you

Assessment will be on a scale from 'Yet to Emerge' to 'Well Developed' with your development monitored from one reporting period to the next.

THE COMMENT

The written comment by your mentor and Head of House is a personal comment to you and is a reflection on the personal growth and development you have demonstrate.

Challenge Report

At the conclusion of their Challenge term all Year 9 students will receive a written report providing feedback on their performance throughout term.

Students will be assessed against the following criteria:

1. Develop a sense of self-awareness
2. Demonstrate self-management skills
3. Develop a sense of social awareness
4. Demonstrate social management skills

The report will also provide assessment on the student's behavior and attitude and provide a personal comment written by Power of 9 staff reflecting upon personal growth and development throughout the term.

Academic awards in Year 9

Certificates of Academic Effort

These awards are presented at the end of each semester to students who have shown outstanding commitment to their academic studies through their ratings against the behaviour and attitude criteria.

Certificates of Academic Achievement

These awards are presented at the end of each semester to students who have shown outstanding achievement in their academic studies through their ratings against the subject criteria at **any** level of difficulty.

Certificates of Academic Excellence

These awards are presented at the end of each semester to students who have shown outstanding achievement in their academic studies through their ratings against the subject criteria at the **highest** level of difficulty.

End of Year Awards for Academic Commitment

These awards are presented to students for exceptional commitment to their academic studies. The prizes are based on a student's final ratings against the behaviour and attitude criteria from their final reports at the end of each term.

End of Year Awards for Academic Achievement

These are awarded for exceptional academic performance. These include awards for:

- Dux
- SRC Prize for Academic Excellence
- Academic Merit

The prizes are based on a student's final ratings against the subject and Challenge criteria from their reports at the end of each semester. Students achieving these awards are also granted 'Academic Letters' which allows for recognition of the achievements on their blazer.

Groom Family Prize for the most outstanding Power of 9 student in the Challenge

This prize is awarded at Speech Night to the student in Power of 9 who shows significant performance and commitment to and personal growth through their Challenge.

The Nettlefold Library – Senior School

The Nettlefold Library is located on the first floor of the H D Baldwin Wing. It caters for the information needs and reading for pleasure.

Opening hours

Monday to Friday 8.00am–4.00pm

Library staff

Miss Anna Davidson, Head of Library
Mrs Michelle Davies, Librarian –
Middle and Senior School

The physical and digital collections of the library are tailored to support the Years 9–12 school curriculum across all subject areas. The staff work closely with classroom teachers to determine the current and future information needs of the whole school community. Library services and activities support the teaching and learning of information literacy skills, with a particular focus on academic integrity research skills.

The fiction collection is organised into genres to support reading for pleasure.

Services and facilities

- 24/7 access to the library via the catalogue and library intranet pages
- Access to digital e-platforms for ebooks and audiobooks
- Extensive video-on-demand with [Clickview](#) at home and school
- Borrowing for books, magazines, ebooks and audiobooks
- Book displays and author focus displays to promote reading for pleasure
- Access to academic databases and individual subject pathfinders to provide reliable sources to support research and learning
- Student-driven book purchasing, helping to maintain a relevant and contemporary range of reading materials aligned with students' interests
- Support for and teaching of the APA and MLA referencing systems and bibliography creation for all forms of information
- Support for students to access the [UTAS Library](#)
- Targeted study skills development sessions

- Lunchtime clubs including book and poetry clubs, as well as politics and film discussion groups
- School-wide participation in special events such as Tasmania Reads, National Simultaneous Storytime and Book Week

A photograph of two cyclists on a dirt path, overlaid with a teal color filter. The cyclist in the foreground is wearing a dark jersey and shorts, with a large pannier bag on the front of their bike. The cyclist in the background is wearing a light-colored jersey and shorts. The path is surrounded by tall grass and trees.

COURSE HANDBOOK POWER OF 9

Your Power of 9 course

In her letter of welcome at the beginning of this handbook Mrs Tulk wrote of the importance of helping you develop and begin to explore your purpose in life.

Your Power of 9 course is designed with this in mind and consists of two parts:

1. your Challenge which you study for one term, and
2. your subjects which you study for three terms.

Your Challenge

This year you undertake one term of study at the Marieville Esplanade Campus that will challenge you in a number of ways – academically, physically, socially and cognitively. You are given the opportunity to engage in controlled risk-taking and to learn more about working effectively as part of a team as you look at yourself and at the world at large.

The skills you will develop will include:

- Flexibility
- Tolerance
- Problem-solving
- Resourcefulness
- Self-reliance and independence
- Teamwork

Each Challenge occurs at a different time during the year. The Challenge consists of two phases:

1. The Experience
2. The Expedition

Your Experience

Your Experience is a series of experiential learning activities built around a number of themes:

LIFE SKILLS – developing the resilience, planning, and teamwork skills necessary to make decisions and take responsibility for your actions.

SPIRITUALITY – exploring the spiritual dimension, about belief and faith, the power of stillness and silence and approaching the ‘big questions’ of life.

LEADERSHIP – developing the skills to make the world a better place, being prepared to lead and be led.

PERSONAL MANAGEMENT – developing the skills in personal organisation, domestic life, physical and mental health and careers to act with confidence as you face major transitions in your life.

VALUES LEARNING – examining core values and the importance of relationships that underpin a life of purpose.

ENVIRONMENTAL AWARENESS – critically evaluating our behaviour so we can develop and manage a more sustainable world.

Your Expedition

In this phase you will experience the exhilaration of personal achievement through involvement in a journey of exploration and discovery unique to your Challenge.

You will experience the sights, sounds, smells and sensations of activities and environments very different from what you are used to. Your Expedition has four phases:

Preparing for your Expedition involves developing the skills required to complete the Challenge, completing expedition skill activities at a training camp and participating in the fundraising for the community service project unique to your Challenge. This culminates in a two-week expedition, purposely designed and unique to each Challenge. Upon your return you will reflect on your participation and evaluate it from a personal and group perspective. You will be asked to think about what you have learnt and its value to you. The final stage is to celebrate the learning of yourself and your team and create a story space to share this with your parents, carers and friends.

Challenge descriptions

Each Challenge is subsidised by the School but in individual cases there will be a levy to cover the significant and unique travel components.

Challenges are allocated based on first, second and third preferences. We endeavor to provide students with their preferences but advise students to consider second and third preferences carefully as running of the Challenges are subject to student interests and Challenge capacities.

Challenges can vary in length due to range of reasons. All Challenges range from 12–14 days. This allows for increased travel distances, intrastate, interstate and internationally; and inclement weather.

Your choices

There are six different Challenges from which to choose:

1. Global Challenge
2. Port Davey Challenge
3. Tasmanian Aboriginal Cultural Challenge
4. Island Challenge
5. Ironbark Challenge

GLOBAL CHALLENGE

Global Challenge is an amazing cultural immersion experience for students to take part in.

This Challenge is developed around key ideas of teaching young people about global citizenship, responsible travelling, self-awareness and social justice.

Due to the overseas travel component, parents/carers are advised that there is a levy of between \$5,600 and \$5,900 for the Challenge. This levy does not include the additional costs of required passports and vaccinations that may be recommended.

This Challenge is dependent upon no travel restrictions being in place at the scheduled time of the trip.

Students learn about connection and making a meaningful contribution to community. They will be immersed in and get to experience a cultural lifestyle and a way of being, different to our own here in Australia.

PORT DAVEY CHALLENGE

The ultimate wilderness challenge! Walk one of the world's premier wilderness treks in the pristine Port Davey area of Southern Tasmania and explore the Bathurst Harbour using Sea Kayaks.

You will see and feel the power of the Southern Ocean, explore the waterways of Bathurst Harbour and Port Davey, traverse the mighty Ironbound Range and be inspired by the beauty of the South Coast.

If you are up for this sort of extreme adventure, then this Challenge is for you.

Parents/carers are advised that there is a levy to charter a boat. This will be in the vicinity of \$700, final cost is dependent on numbers

TASMANIAN ABORIGINAL CULTURE CHALLENGE

The Tasmanian Aboriginal Culture Challenge will allow you to discover the depth of traditional cultural knowledge present here within our home State. By traveling to significant places throughout Tasmania with members of the local Aboriginal community, we will learn the stories of the past, understand the present and look to the future. Experiencing our beautiful and wild places through an Aboriginal cultural lens will transform and enrich our connection to the place we call home. This journey of discovery will broaden our knowledge and respect for one of the world's oldest living cultures and provide an opportunity to contribute to our society through community service with local organisations and charities.

The Challenge will provide opportunities to have hands on experiences. Students will be shown how to create, care for and live off the land like Tasmanian Aboriginals have done for many generations.

There is no levy for this Challenge.

ISLAND CHALLENGE

The Island Challenge will present you with a real-life adventure through a problem-solving, multi-sport team challenge. It will involve an extended stay in Tasmania's isolated wilderness. You will experience the realities of remoteness and have to be self-sufficient, self-reliant and also work as part of a team.

You will begin the Challenge with very little information and your journey will be 'discovered' as you go. It will involve being outdoors for the majority of your time away and you will be making camp, preparing meals and 'living' in a variety of the spectacular environments our island state has to offer. You will have to use your mind just as much as your physical skills to get through this Challenge. Your comfort, success and enjoyment will be a product of your team's combined skills and co-operation.

Like the other Challenges there will be a community service component however, unlike the others your itinerary will be a closely guarded secret. If you are prepared to deal with life's 'unknowns' you will thrive in this Challenge.

There is no levy for this Challenge.

IRONBARK CHALLENGE

Based in the stunning landscapes of Tasmania, this challenge blends elements of a farm stay with camping adventures, offering a mix of creative, personal, and outdoor experiences. Students will explore farm life, have the opportunity to express themselves through the arts, and develop leadership, teamwork, and problem-solving skills.

With a more relaxed pace, the Ironbark journey allows time to reflect, while still offering challenge through activities designed to cater to the group, like kayaking, bushwalking, cycling, and more. Combining both accommodation and camping elements, the program supports resilience, confidence, and personal growth—encouraging students to learn from nature, work together, and discover new ways to create and lead, and explore various roles within a group.

If you have interests in or would love to learn about farming, arts, contributing to community and would like a little bit of outdoor adventure on the side, this is the challenge for you.

There is no levy for the Ironbark Challenge.

Your subjects

The Hutchins Curriculum is based on the content and standards for the Australian Curriculum.

Compulsory subjects

You study the following compulsory subjects:

- Building Connections
- English
- Health and Physical Education
- History and Religious Studies
- Mathematics
- Science

Elective subjects

You also study four elective subjects – a mix of creativity, language and performance subjects. Your choices are:

- Chinese
- Designer Maker
- Drama Technique
- Film Making
- Financial Literacy
- French
- Game Making
- Music
- Philosophy
- Sports Development Program
- Visual Arts and Media

There are further electives specifically designed for those students who require specific academic support. Some students may be required or be recommended to choose one of these electives:

- English as an Additional Language or Dialect Support
- Year 9 Academic Support

Subject descriptions

BUILDING CONNECTIONS

(COMPULSORY)

Building Connections explores the modern concept of 'career' which encapsulate everything we do in life. Students are encouraged to explore and develop self-knowledge, investigate and research pathway options, learn about and identify employability and transferable skills, all within the context of the rapidly changing world of work and individual life goals.

Areas of study

- Self-knowledge and development
- Career investigation and exploration
- Skills identification and concept of skill transferability
- Labour market statistics and trends
- External drivers of workforce

Faculty

Career Education and Vocational Learning

CHINESE (ELECTIVE)

Chinese provides you with the opportunity to use and understand Chinese vocabulary, grammar and script to communicate information and attitudes about yourself, your relationships with others, schooling and daily life. Through a range of cultural topics you learn and practise conversational Chinese relating to social interactions and real life situations. Through your study of traditional and contemporary Chinese culture you reflect on your own habits and beliefs and make informed comparisons. You develop an understanding of the potential to apply your skills in Chinese to undertake further study, training and leisure, or future employment.

Performance in conversations, vocabulary, aural and written comprehension tests, reading and writing tasks and research assignments are the basis of your assessment.

Background speakers of a Chinese dialect are not eligible to study Year 9 Chinese.

Areas of study

- Communicate with others in spoken and written Chinese
- Increase vocabulary
- Practise pronunciation
- Practise comprehension of written and spoken Chinese
- Study and compare the grammatical structures of Chinese and English
- Converse in Chinese including contact with native speakers and role plays
- Study Chinese people: the environments in which they live around the world; their culture, philosophy and history; food; school routines of students your age; transport; shopping habits of teenagers; media, music, sport and the arts

Future pathways

Students who are studying Chinese in Senior School can take the HSK Chinese Proficiency Test in Terms 3 and 4 at Hutchins. This is an internationally recognised certification which will enable students to benchmark their language level globally and apply to study at Chinese universities.

Faculty

English and Modern Languages

DESIGNER MAKER (ELECTIVE)

In this subject you will be working as a designer to produce working products. Imagination and problem solving will be the key skills you will develop along the way. You will explore a variety of industrial processes, work with high quality materials and learn how to visualise your ideas and bring them to life. At the end of the course you will be provided with opportunities to test and trial your amazing creations.

Areas of study

- Drawing, sketching and CAD techniques as a means of visualizing and communicating ideas
- Learning the characteristics and applications of materials
- How to solve problems using the design process
- Using and caring for hand tools, power tools and workshop machinery
- Develop safe work habits both individually and in groups in a workshop setting

Future pathways

This course would be a valuable pathway to 10 Creative Design and Innovation, 10 CAD/CAM and Digital Fabrication, Housing and Design TASC 3 and Engineering Design TASC 3 courses.

Faculty

Design, Production and Digital Technologies

DRAMA TECHNIQUE (ELECTIVE)

Drama deals with communication. All activities challenge you to experiment with varying forms of communication. Through the study of the elements of drama you develop and present a variety of works to assist in the improvement of confidence, group work, voice and character development.

Areas of study

- Experiment with the elements of drama: story sequence, conventions, climax and introduction to character development
- Create characters for performance and develop performance skills
- Present drama works drawing from varying stimulus materials
- Develop strategies to explore dramatic technique and form

Faculty

Visual and Performing Arts

ENGLISH (COMPULSORY)

Year 9 English will give you the opportunity to practise literacy and information literacy skills to help you communicate effectively and confidently. Through a variety of activities you will create and craft imaginative, analytical and persuasive texts and respond to issues relevant to you. You will study some contemporary texts and some classics, including Shakespeare, recognising how events, situations and people can be represented from different perspectives, and draw conclusions about characters, events and key ideas.

Areas of study

Language skills, speaking and writing effectively

- Language skills: spelling system, punctuation, grammar and referencing
- Vocabulary and text organisation
- Express and develop ideas in speaking and writing

Literature; novel, Shakespeare, poetry

- Representation, historical context, ideas and values
- Text structures and language features
- Create literary texts which develop a personal style and make thematic connections with other texts

Literacy, media, film

- Representation, audiences and perspectives
- Language, structure, sound and visual choices
- Create engaging representations of people, places, events and ideas

Faculty

English and Modern Languages

ENGLISH AS AN ADDITIONAL LANGUAGE OR DIALECT SUPPORT (ELECTIVE)

English as an Additional Language or Dialect (EALD) is recommended if you are from a non-English speaking background and need to develop and consolidate your English skills. You increase the range of strategies you use to communicate confidently and effectively and to participate in all aspects of life in Australia, including further education. You develop an understanding of the cultural diversity of Australia and make informed comparisons with other cultures. There is also scope to support your learning in other subjects.

A preliminary assessment determines the appropriate level for you to study.

Areas of study

- Research and discuss: the environment, culture and history of Australia, migrant experiences and issues in the media
- Respond reflectively and creatively to the themes explored in poetry, short stories and film
- Develop vocabulary through composing a range of text types including imaginative, analytical, reflective, persuasive and research report
- Practise planning, drafting, editing and proofreading skills

- Develop study skills: independent learning, researching and using information from a variety of sources, including ICT
- Practise communicating information effectively in spoken and written form

Faculty

English and Modern Languages

FILM MAKING (ELECTIVE)

This subject provides hands-on experience of how to tell a story using camera movement and different lighting techniques. It is project-oriented and focuses on you creating short films and other projects to inform, entertain and persuade. Varying aspects of basic filmmaking will be covered and is an excellent introduction to to Year 10 Visual and Performing Arts subjects.

Areas of study

- Create films that reflect understanding of camera techniques
- Collaborate to create group film projects
- Manipulate film for a specific purpose
- Create and edit own works for an audience

Faculty

Visual and Performing Arts

FINANCIAL LITERACY (ELECTIVE)

Financial Literacy provides students with the information, knowledge and disposition necessary to make sound financial decisions to improve financial wellbeing. The development of financial literacy means students will be able to understand and navigate the financial landscape and make better decisions about their money.

Areas of study

- Budgeting/goal setting
- Banking and the role of credit
- An introduction to Superannuation
- Current issues – crypto currencies, buy now pay later and financial scams
- Playing the ASX Schools Sharemarket Game (when available)
- Philanthropy

Faculty

Humanities and Social Sciences

FRENCH (ELECTIVE)

Developing your French as part of the Power of 9 program provides you with essential skills that are invaluable for travel within the wide-ranging Francophone world. Through a range of cultural topics, you practise conversational French, producing filmed sketches in the process, as well as having regular contact with a native speaker. Excursions within the Greater Hobart area help students to connect with the historical and contemporary links between France and Australia. This course aims to help you develop an understanding of how you can apply your skills in French to leisure pursuits, further study or future employment.

Areas of study

- Study the Francophone world, its culture and history
- Learn about Francophone students your age, their school routines, leisure pursuits and interests
- Develop your spoken French, including regular contact with a native speaker
- Improve your knowledge of French grammar, appreciating how beneficial it is to understand the mechanics of an additional language
- Develop skills and disciplines that will help you with any language you may decide to learn in the future, especially those belonging to the 'Romance' family

Faculty

English and Modern Languages

GAME MAKING (ELECTIVE)

Using software programs this subject enables you to design computer games with backgrounds, animated graphics and use music and sound effects without learning programming code. These games can include simple platform, puzzle, maze, action, or complex 3D games.

You develop skills and understanding of game design from concept to completion including what a game is and how games work; the different game genres, gameplay modes and game features; create a design brief and gameplay (like a screenplay) when planning the game; the key media in producing a game; and how to evaluate a game design, the product and its marketing. Learn to be a creator and not just a consumer.

Areas of study

- Design, make and critique your own game using Game Maker software
- Produce a game manual incorporating screen shots on how to play the game
- Solve multimedia design and programming challenges
- Choose and evaluate an existing game from the Game Maker site
- Research and write a report about social issues raised about computer gaming

Future pathways

This course would be a valuable pathway to 10 Digital Technologies and Data Science and Digital Technologies TASC 3 courses.

Faculty

Design, Production and Digital Technologies

HEALTH AND PHYSICAL EDUCATION (COMPULSORY)

In this subject, students will engage in physical activities designed to enhance overall fitness and promote both physical and mental wellbeing. A strong emphasis is placed on demonstrating independence, self-management, and consideration for others. Additionally, students will investigate a range of health-related issues that influence personal, social, and community wellbeing.

Areas of study

- Games for fitness
- Running and aerobic conditioning
- Weight training
- Food and nutrition
- Relationships and sexuality
- Alcohol and other drugs
- Mental health and wellbeing

Faculty

Health and Physical Education

HISTORY AND RELIGIOUS STUDIES (COMPULSORY)

History and Religious Studies integrates the study of history, religion and society with an emphasis on the development of Australia within the context of an advancing modern world.

Areas of study

- The emergence of economic, political and social ideas and the movement of peoples in the 18th and 19th centuries
- The Industrial Revolution
- Comparative religion
- World War I
- Making a nation
- Australian Civics and Citizenship

Faculty

Humanities and Social Sciences

MATHEMATICS (COMPULSORY)

Students study Year 9 Australian Curriculum Mathematics. This subject gives you an appreciation of the role of mathematics in society. You acquire skills that will enable you to solve problems in everyday, real life situations and to pursue further studies in Mathematics.

All classes undergo common tests held at regular intervals in order to measure your progress and to help identify priorities for improvement.

Areas of study

- Algebra
- Geometry
- Trigonometry
- Perimeter, area and volume
- Probability and statistics

Faculty

Mathematics

MUSIC (ELECTIVE)

In Year 9 Music, students explore music through the works of various composers and ensembles, seen as the rebels and revolutionaries in sound. Students gain an appreciation for the innovators of music as they pushed the boundaries of music through the ages. These are the experimenters in new sounds, new instruments, new genres, new concepts, and new ways in making music. Using these revolutionaries as guides, students continue to explore and experiment with their own music-making through composing and performing, developing a personal voice as composer, performer and audience. They make, manipulate and respond to music independently and in small groups, building on their own interests, skills and innovation as performers and content providers.

Areas of study

Students continue to develop their aural and theory skills as they build on their understanding and use of the elements of music. They are encouraged to extend their understanding and use of more complex rhythms, vocal and instrumental techniques, compositional devices and performance expression in different forms. Students will explore meaning and interpretation, forms and elements, as well as the social, cultural and historical contexts of music to gain a greater appreciation as to how this informs the music they make and respond to in performance work, compositional tasks and music technology.

PHILOSOPHY (ELECTIVE)

Year 9 Philosophy introduces us to and explores the notion of 'How are we situated in this world?' The overarching themes for the semester include environmental philosophy, ethics, mind and body, freedom and nature. We ask questions such as 'What do we mean when we talk about nature?', 'What is the value of the natural, that is, non-human environment, to us, or in itself?' and 'What is our place in the natural world?'

Areas of study

- An introductory look at the main philosophical areas of epistemology, metaphysics, ethics, the existence of God and free will
- Important Eastern and Western thinkers – Plato, Aristotle, Socrates, Descartes, Kant, Leibniz, Locke, Hume, Berkeley, Aquinas, Confucius, Lao Tzu, Gautama, Nagarjuna (Mahayana), Bodhidharma (Chan), Dojen Zenji (Soto), Kitaro Nishida, DT Suzuki

Faculty

Humanities and Social Sciences

SCIENCE (COMPULSORY)

This subject challenges you to understand the complexity of the changing nature of the Earth through the study of physics, chemistry, biology and geology. You learn how science affects us in our daily lives, how it enables us to make evidence-based decisions on social issues and the environment and how it helps us to understand technology.

Areas of study

You will explore ways in which the human body as a system responds to its external environment and the interdependencies between biotic and abiotic components of ecosystems. You will learn about the atom as a system of protons, electrons and neutrons, and how this system can change through nuclear decay. You will investigate how matter can be rearranged through chemical change and be introduced to the concept of the conservation of matter. You will develop your ideas on energy and how it is transferred. You will learn how the theory of plate tectonics explains global features and events in terms of geological activity, continental movement and geological timescales.

Faculty

Science

SPORTS DEVELOPMENT PROGRAM (ELECTIVE)

This subject provides an insight into the relationship between fitness, wellbeing and sporting performance. It increases your understanding of what it means to be physically healthy and how sporting performance can be enhanced. It also develops your understanding of human movement, the human body in action and the biomechanical principles involved.

You will complete a range of fitness assessments and an analysis report. Students must be prepared to actively participate in a mix of theory and practical lessons throughout this course.

Areas of study

- Body systems – skeletal and muscular systems
- Fitness – components, testing and analysis
- Types of training

Faculty

Health and Physical Education

VISUAL ARTS AND MEDIA

(ELECTIVE)

In this subject you acquire design skills and undertake creative projects using a variety of media. Ideas may be drawn from a range of sources.

Areas of study

These may include:

- Creative design
- Drawing, painting and printmaking
- Digital photography
- Sculpture

Faculty

Visual and Performing Arts

YEAR 9 ACADEMIC SUPPORT

(ELECTIVE)

Placement is based on selection due to eligibility or invitation by Centre for Excellence staff.

Academic Support is available for eligible students outside of their challenge term.

This subject assists identified students on ILPs (Individualised Learning Plans) and who receive adjustments through the NCCD, to manage their curriculum requirements. This subject provides tailored support for students who benefit from additional time and guidance in literacy, numeracy, time management or study skills. It is designed to strengthen core skills and build learner confidence through targeted instruction aligned with each student's individual learning needs with the goal being to develop proactive and resilient students who can effectively and responsibly manage multiple tasks and deadlines.

As with all Centre subjects, enrolment is dependent on student needs and therefore negotiated with the Centre staff.

Faculty

Centre for Excellence

Assessment of your course

Challenge and Learning outcomes

Each Challenge and subject has specific criteria against which your performance is assessed. The ratings used are:

A	You have an extensive knowledge of content and an excellent capacity to apply knowledge, understanding and skills in new contexts. You are achieving well above the standard expected.
B	You have a thorough knowledge of content and a strong capacity to apply knowledge, understanding and skills in new contexts. You are achieving above the standard expected.
C	You have sufficient knowledge of content and a sound capacity to apply knowledge, understanding and skills in familiar contexts and some unfamiliar contexts. You are achieving at the standard expected.
D	You have basic knowledge of content. You have a minimal capacity to apply knowledge, understanding and skills in a familiar context. Your achievement is approaching the standard expected.
E	Work submitted does not meet the minimum standard.

Work practice and attitude

Your teacher will also assess your work practice and attitude. The assessment is against four criteria:

- Engagement with learning
- Effort
- Task completion
- Conduct

The ratings used are:

VG Very Good

G Good

S Satisfactory

IR Improvement Required

The standards for these ratings can be obtained from your teacher.

Australian Curriculum achievement standard

All subjects that are currently part of the Australian Curriculum will be assessed against the relevant standard.

GETTING ADVICE

Choosing your course

Think about your choices with the following points in mind:

1. Ask yourself these questions:
 - Which Challenge really captures my imagination?
 - What are my interests and hobbies?
 - What have I never experienced before?
 - What am I good at or do I find interesting?
 - Which subjects will provide a good background for further study in Year 10 and beyond?
2. Read the descriptions carefully
3. Talk with your current teachers about your strengths and interests
4. Talk with your parents/carers and friends
5. Participate actively in the Power of 9 Course Choice Evening and obtain more information from the Co-ordinator of Power of 9, Heads of Faculty and other teachers
6. Make your choices:
 - List two Challenges in order of preference
 - Choose six electives
 - You will only study four of these electives throughout the year
7. Receive notification of your course
8. Changes to your course once it is confirmed must be discussed and approved by the Dean of Studies and Learning Analytics, Career Education and Vocational Learning Officer and your parents/carers

Advice to parents/carers

Year 9 is a key transition year, in keeping with your child's growing sense of independence, more will be expected of them in accepting responsibility, being accountable, responding to challenging learning opportunities, pursuing academic excellence in their Power of 9 course and achieving in a diverse range of learning situations.

Year 9 should be seen as an opportunity to learn and apply skills, explore new curriculum areas and make new connections as your child develops extended working and friendship groups within the School and their local community and the world at large. Importantly, it is an opportunity to develop the personal and academic skills and knowledge to help them progress into the Senior School Years 10–12.

You can assist your child in this important process by:

- Discussing the course choice process with them and negotiating your role
- Allowing them to be more independent and responsible for their actions and decisions
- Helping them write down life and career goals and how to reach them
- Recognising what learning they have completed, e.g. school results, achievements in competitions, qualifications they have earned (such as a First Aid Certificate or AMEB award), sporting awards, workplace learning (through paid or unpaid work)
- Recognising what interests they have in arts, clubs, hobbies and sports
- Recognising their personal strengths and attributes
- Helping them learn about selected occupations and career pathways and the education and training requirements
- Identifying areas where they need more information and what that information may be

Information for international students

- Working with us and supporting their learning to ensure their plans are on track by contacting their mentor, the Careers Counsellor and coming to Family/Teacher Conferences

All Challenges and subjects are offered to international students. Every attempt is made to provide the choices a student selects. A Challenge or subject will not run if there are insufficient numbers. At other times the Challenge or subject may have been completed or may be full. In the event that a Challenge or subject is not available the Careers Counsellor or Dean of Studies and Learning Analytics will provide advice to international students of appropriate choices and alternative pathways.

The Overseas Students Ombudsman can investigate complaints about action taken by us for such things as refusing admission to a course, course progress or attendance and incorrect advice being given. If you wish to lodge an external appeal or complaint you can use this free and independent service. Visit the Overseas Students Ombudsman website www.oso.gov.au or phone 1300 362 072 for more information.
